

Video Instructions

We would like you to film yourself talking to the camera (**using the short script below**) from your living room, your kitchen, your backyard... anywhere in your home where you are comfortable.

Please **make sure you film in a landscape format** – not portrait.

Remember, we are going to edit the footage with lots of other videos from other families, with the end result being a LITTLE bit like this – [“How are you going to say thank you?” 2020 video](#).

With this in mind, we need you to **talk slowly and clearly**, and take a **long pause** (at least a few seconds) between each phrase.
